15 JUN 1979

Mr. Jim Wisniewski, R.S.
Division of Solid and Hazardous Waste
Management Division
Department of Health
Commonwealth of Virginia
401-A Colley Avenue
Norfolk, VA 23503

Dear Mr. Wisniewski:

The purpose of this letter is to confirm your operating requirements for asbestos and inert chemicals disposal issued following the inspection of the CD area landfill on June 12, 1979. These requirements are as follows:

The inert chemicals and asbestos shall be buried within the 6 acre site immediately east of the secured parking area (see attached map).

The site shall be graded as required to prevent impoundment of rainwater.

The disposal area shall have a 1' clay base and 6' clay berms. Final cover shall consist of a 2' layer. The top 1' of material shall be clay.

All wood, debris or other vegetation which might puncture asbestos bags shall be removed from area.

Asbestos wastes shall be placed in landfill by hand.

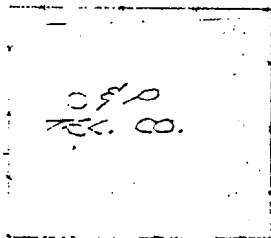

It is proposed to begin the disposal operations in the northwest corner using the existing 3' and 6' berms. Site preparation will begin immediately. Questions or comments regarding this matter should be addressed to Mr. M. White or Mr. P. Cunanan of this Command, telephone 444-7313.

Sincerely yours,

J. G. Leech
